

Schools Pass/Fail Rates Disclosure Statement

The pass/fail rates reflect results of all examinations taken during the period between January 1, 2004 - September 30, 2004 for graduates from the corresponding school. The results include re-exams for the practical and/or written for each license type and exams from students who may have graduated from prior classes, but have taken the exam during the specified time frame.

Due to ongoing examinations in 2004, the pass/fail rates reported here may not correspond with the pass/fail rates reported by the schools. The Board asks that you contact the individual schools for the most up-to-date information.
